

- Note**
- Currently this license transfer configuration is available at organization level instead of product line.
 - The approach that currently being used may have license leakage.
 - The recommended approach requires alignment from other businesses who are currently using this functionality.
 - Discussions are in progress with other SBGs stakeholders to migrate to the recommended approach
 - If we don't get alignment from other SBGs, then this would require enhancement from Flexera to made this configuration at product line level
